Our Products

For businesses in need of an entire industrial refrigeration system and for those in need of just a spare part, P.R.S. is a one-stop shop, making it easy to get the products you need on time and at a price you can afford.

Process Systems

We offer a variety of process systems for all types of business applications:

- Process Chillers
- Heat/Cool Skids
- Tank/Vessel Pump Skids
- Ammonia Refrigeration Systems
- Vapor Recovery Units
- Automation Systems

Equipment

P.R.S. proudly offers the highest quality parts and machinery, including:

- Compressors
- Condensers
- Pumps
- Heat Exchangers
- Chillers
- Valves
- ASME Vessels

Parts & Accessories

To help minimize loss in the event of a part failure, P.R.S. keeps a large inventory of replacement parts and accessories on hand and available at competitive prices. There's no reason to let the little things get you down.

Our Services

Frustrated with consistent problems and failures of your current refrigeration system? Curious to know how your company could benefit from an equipment update? Considering a custom-built system to maximize results? P.R.S. can provide you with the knowledge and resources to address your most pressing industrial refrigeration questions and concerns. From evaluation, to development, to implementation, we are experienced and trained to help overcome your system flaws and get your system in shape for future success. We proudly offer our expertise in these areas:

→ Consulting

We will assess your current situation and give our recommendations for the best plan of action to meet your specific needs.

→ Engineering and Design

Our engineers will examine the requirements and specifications that are unique to your situation and build a solution that is customized just for you.

→ Custom Fabrication

In our in-house fabrication facility, P.R.S. will build components suited for your operational needs from entire systems to partial structures including pressure vessels, low temperature piping, tanks, skids and more.

→ Installation, Repairs and Maintenance

We will see that your equipment is properly set up and maintained to ensure maximum system health and productivity.

Out with the Old

One of the biggest factors in improving efficiency is updating your equipment. Your old machinery simply wasn't made to produce the energy-saving results that today's high-efficiency products and parts can offer. At P.R.S., we specialize in providing ways to **reduce energy consumption** and in turn, drastically **improve the reliability** of your refrigeration system. Contact us to help you bring your system up to speed.
